Product Highlights

- 8.4” Touch screen display
- ECG / SpO2 / NIBP / Resp / Printer (Temp & EtCO2 optional)
- Adap-DSP provides precise NIBP measurement
- Nellcor SatSeconds and OxyCRG
- Display freeze and ECG rewind
- Patient data transfer

Multi-Parameter Vital Signs Monitor

The Sentinel-V 3025i provides more features and flexibility than Cardell/Midmark and Surgivet multi-parameter monitors, at a lower price. It now comes with patient data transfer capabilities, Nellcor SatSeconds, and first in the industry OxyCRG and Adap-DSP, providing advanced diagnostic information for all sizes and types of animals. These features make the best vital signs monitor even better.

The 3025i multi-parameter monitor features proven and dependable technology. The 8.4” Touch Screen display is viewable from any angle, providing clear view of waveforms and full monitoring parameters.

Sentinel-V 3025i
Multi-Parameter Vital Signs Monitor

Patient monitoring is a must in every veterinary clinic.
The Sentinel-V 3025i is a multi-parameter vital signs monitor that offers both flexibility and reliability in the variety of sensors it is capable of utilizing.

*See Sensor accessory product sheet 3025i for detailed sensor information

### Adap-DSP™
Combines quicker deflation times with adaptive signal processing to deliver more precise NIBP measurements.

### Nellcor SatSeconds
Reduces “nuisance” alarms for more reliable notifications.

### Alarms
Ability to set multi-parameter alarms to assist with optimal patient care. Capable of printing pertinent vitals information directly after a critical event.

### Specifications
- 8.4” Touch Screen display.
- ECG / SpO2 / NIBP / Resp / Printer (Temp + EtCO2 sensors optional)
- Mainstream EtCO2 capable (Plug ‘n Play option)
- Adap-DSP™ adaptive filter algorithm provides precise NIBP measurement
- Display Freeze and ECG Rewind
- Nellcor OxiMax SpO2
- Nellcor SatSeconds and OxyCRG
- Li-ion battery provides 4 hours of operating time
- USB port for data transfer
- Patient Data Capability: name, sex, weight, type
- Portable and Lightweight
- BPM 20-320
- Up to 7 waveforms on one screen
- 96-hour graphic and tabular trends of all parameters
- HRV, Arrhythmia analysis and S-T segment analysis
- Resistant to high-frequency interference
- Built-in printer and rechargeable battery
- Dimensions: 4”D x 9”H x 9” W

### Standard Accessories:
- 3-lead ECG GLL Lead Cable and Clips
- Y-Clip Lingual Sensor
- Assortment of five cuffs 3cm - 17cm
- Conductive Gel
- Paper

### Optional Accessories:
- Mainstream EtCO2 Sensor
- Temperature Probe
- Esophageal Probes (3 sizes)
- 5-Lead ECG GLL Cable and Clips
- IV Pole Clamp
- Mobile Stand
- SpO2 Lingual Sensor
- C-Clip SpO2 Sensor
- Flexible Wrap SpO2 Sensor
- Transflectance SpO2 Sensor
- Rectal SpO2 Sensor
- SpO2 Extension Cable
- Y-Clip small/large
- Blood Pressure Cuffs
